Fontecoat FD 20

A SEMI-MATT WATER-BORNE
EPOXY DIRECT-TO-METAL
PAINT

Protect steel quickly and safely

Fontecoat FD 20 is a fast-curing epoxy paint for the long-term protection of steel surfaces

Sustainable corrosion protection

Fontecoat FD 20 is a two-component fast-curing epoxy paint for long-term corrosion protection of framework, service platforms, and conveyors, as well as other steelwork, machinery, and equipment. The product is water-borne and doesn't create dust when sprayed, making it both environmentally friendly and safe to apply.

When used with Temakeep adhesion primer, Fontecoat FD 20 has excellent adhesion and surface tolerance, enabling extremely fast cycle times. It has been especially developed for use as a single-coat paint, but it can also be used as a primer, as an intermediate coat in epoxy/polyurethane systems, or as a topcoat.

BENEFITS:

- ☒ FAST CURING FOR LESS DOWNTIME AND LOWER COSTS
- ☒ SELF PRIMING WITH LONG-TERM CORROSION PROTECTION
- ☒ EASY TO APPLY FOR A FASTER PAINTING PROCESS

The product can be applied in thick layers to speed up the painting process, with surfaces touch dry in just two hours at room temperature. Fontecoat FD 20 also has very good resistance against mechanical and chemical stress.

For application instructions please refer to the product data sheet.
