Fontedur HB 80

A TWO-COMPONENT, WATER-BORNE
POLYURETHANE TOPCOAT

Long-term good looks

FONTEDUR HB 80 IS A DURABLE, WATER-BORNE TOPCOAT WITH OUTSTANDING GLOSS AND COLOUR RETENTION

Protect surfaces from climatic and chemical stress

Fontedur HB 80 is a two-component, water-borne polyurethane topcoat with superior gloss and colour-retention properties. It forms a durable, easy-to-clean and non-chalking film that is resistant to mechanical, chemical and climatic stress – making it ideal for environments where durability and aesthetics are equally important considerations.

Fontedur HB 80 is a water-borne product with low volatile organic compounds (VOCs). As a low emission product, it is more user and environmentally friendly than conventional solvent-borne products. It is recommended as a topcoat on epoxy/polyurethane systems on steel surfaces, particularly machinery such as agricultural and earth-moving equipment as well as steel frameworks and other steel structures. Fontedur HB 80 can be cured at high temperatures to increase the efficiency of the painting process.

For application instructions please refer to the product data sheet.

BENEFITS

- ☒ SUPERIOR GLOSS AND COLOUR RETENTION
- ☒ DURABLE AND EASY-TO-CLEAN FINISH
- ☒ WATER-BORNE WITH LOW VOCs
